# US/Canada Venture Capital pipeline

The US/Canada Venture Capital Pipeline links venture capital firms (VCs), investment banking firms and other investors based in the U.S. with Canadian companies seeking financing.

The first Pipeline was held in June 2002 and 16 additional events have occurred since that date. The event is designed to build relationships and create business opportunities between U.S. investors and Canadian companies.

This May, multiple pre-screened Canadian Life Sciences companies will come to Boston to meet one-on-one with U.S. investors.

Any venture capital, investment banking firm or other investor interested in reviewing the executive summaries of the pre-screened companies are asked to contact:

Leonard Gold at 617.345.3831  
or [lgold@burnslev.com](mailto:lgold@burnslev.com)
